

“Check your engines – Find new business opportunities”

Check Point®
SOFTWARE TECHNOLOGIES LTD.

SECURITY CHECKUP

Discover Security Risks Your Customer's Network is Exposed To

Check Point is offering an onsite network assessment that will give visibility into the network, uncovering security incidents and risks. Security Checkup provides a comprehensive report that identifies:

- ✘ The current security status
- ✘ Various types of security risks such as malware downloads, bot infections, high risk web applications, data loss and more
- ✘ Suspicious activity or source of data leaks
- ✘ Recommendations on how to eliminate threats and resolve your security issues

Make use of this report in order to generate new business opportunities.

How Westcon supports its partners

CHECKUP APPLIANCES

Westcon provides the necessary technical equipment.

TECHNICAL EXPERTISE

Westcon engineers support you to set up the installation and configuration, to launch the audit at the end user's and to analyze the subsequent report.
